

Additive Manufacturing and 3D Printing International Conference

CALL FOR PRESENTATIONS

We are delighted to announce the Call for Presentations for the 2018 **International Conference on Additive Manufacturing & 3D Printing** which will once again take place at The Nottingham Belfry Hotel, Nottingham, UK on 11th & 12th July 2018.

The 13th International Conference on Additive Manufacturing & 3D Printing will focus on developments in AM processes and materials, design, modelling and simulation software systems for AM, supply chain management and business strategy, and also additional novel applications of additive manufacturing across industry sectors.

To maintain its position as a leading conference in this field, the organising committee has decided that in addition to a carefully hand-picked section of speakers, a number of presenters at the 2018 conference will be selected from exceptional abstract submissions.

Abstracts of 400 words maximum are therefore now invited from leading academics or industrialists engaged in either AM research or commercial application. Abstracts promoting commercial products or services will not be accepted*. Product vendors and others who wish to promote a product or service are invited to participate in the on-site vendor exhibition.

Speakers will be charged a fee at the preferential rate of £320 (+ vat)

Abstracts, giving a concise and informative description of the presentation, should be submitted in MS Word format as an email attachment (text only, no images, diagrams, tables, charts etc. in the abstract submission process). Abstracts should arrive by 9:00am (GMT) on **5th February 2018** to: donna@am-conference.com

Important dates and deadlines:

Submission of abstract deadline: 5th February 2018

Notification of acceptance of abstract: 12th February 2018

Final presentations to be supplied for proceedings: 11th June 2018

EVENT DATE: 11th & 12th July 2018

* We will not accept abstracts from companies who are actively marketing a machine or are close to marketing a machine. If vendors do not have a machine to sell at the time of the presentation we will consider their participation, providing the presentation is future looking and not sales led.
